PROJECTS

[SYNCSpace ↗](#)

Sep 2025

Developed a real-time project hub with the MERN stack, featuring secure JWT authentication and role-based access. Engineered a live team chat with Socket.IO and drag-and-drop Kanban boards for task management. Implemented file sharing and collaborative document editing, deploying the app on Vercel with MongoDB Atlas.

[GigConnect ↗](#)

Jul 2025 - Aug 2025

GigConnect – A Hyperlocal Freelance Marketplace

- Built a real-time freelance platform using the MERN stack to connect clients and freelancers.
- Implemented dual-role authentication (Client & Freelancer) using Firebase and JWT for secure access control.
- Developed a complete gig lifecycle: gig posting, applying, progress tracking, and payment workflow.
- Integrated Razorpay for seamless in-app payments with automated review & rating system.
- Enabled real-time chat between clients and freelancers using Socket.IO for instant communication.
- Created an Admin Dashboard to manage users, gigs, and payouts securely.
- Deployed on Vercel with MongoDB Atlas for scalability and high availability.
